

## Custom Table Pad

### Custom Table Pad

A custom table pad is table pad that is tailored according to certain specifications. Dining and pool tables come in different shapes and sizes, so it is essential for a pad to be customized so that it will properly and efficiently protect your table top.

You can customize either a round glass dining table or a rectangular table with two leaves. Aside from the size and shape specifications, you can pick out the color you want for your table pad.

Generally, you do not have to pay extra for customizing your table pad. Within a certain range of pad size, the prices are fixed. However, if you need a larger table pad, say longer than 110 inches or bigger than 60 inches in diameter, then you probably need to pay extra for it to be customized.
